Tissue culture plants

“
Passion,
collaboration
and 30 years
of experience
”

Bent Larsen

Bent is the founding director of PP Nordic. With more than 30 years of experience in the plant business, he knows the horticultural industry inside out. Bent handles both purchasing and sales in PP Nordic and he is particularly passionate about developing concepts in close collaboration with his customers – and to see it sprout from an idea to a successful saleable solution.

As a trained grower technician, his career has allowed him to work with all aspects of the trade – production, sales, and purchasing – in countries as Switzerland, the United States, Israel, and Denmark. His great knowledge of the industry is also harnessed when he travels the world to personally discover and find new plants.

Bent is part of all phases of the projects, and he personally takes care of both purchasing and sales.

Preferred supplier

By providing unique plant product solutions of the highest quality from the world's best breeders, Plant Partners strive to be the preferred supplier to professional nurseries worldwide.

Green growth is our business – connecting customers to our network of superior plant collectors, we customize solutions that will make your plant business live and grow.

Tissue Culture Plants

PP Nordic is your reliable partner in the production and sales of tissue culture plants.

We have partnerships with some of the world's best producers, which are market leaders in their specific field of the horticulture industry.

In addition to a wide range of well-known and popular plants, we also offer tissue culture propagation and initiation from growers own selected mother plants.

For more information about products and possibilities, please contact Bent Larsen at bl@ppnordic.dk

“

**Using our carefully
selected network of
partners in all parts of the
world, we can guarantee our
customers unique plants of
the highest quality at
competitive prices**

”
